ATLANTIC COAST
MIGRATION OF AGRICULTURAL WORKERS

AREAS - CROPS - MATURITY DATES

Prepared by C. W. E. Pittman
Division of Recruitment and Placement, Extension Service
U. S. Department of Agriculture

TO AGRICULTURAL MIGRANTS

This map and the information accompanying it has been prepared by the Agricultural Extension Service for your use. Keep it with you on your trip up the coast. It will answer many questions.

The county agents, whose names and addresses are given on the back are employees of the Extension Service. They will help you to get work. Do not hesitate to visit, write, telephone or telegraph them.

In every area in which you work there will be one or more "placement" men working with the county agent. Find out who they are and get to know them. They can help you in many ways.

Migratory harvest hands are welcome in all the areas and many things are being done to help them go from area to area. Get your county agent to give you an identification card stating that you are a migratory farm worker. It will help you wherever you go.

GETTING A JOB

When you have finished your work in one area and want to work in another area but do not have an employer, ask the nearest county agent or his placement man to help you. They have information in their offices about employment in other areas. Do not go to other areas until you are sure of work there.

INFORMATION STATIONS

Information helpful to you will also be available at Information Stations operated by Extension Service employees. STOP AND TALK to the men at the stations which are located as follows:

In Florida on U.S. Highway 17 just south of the Georgia line.
In North Carolina on U.S. Highway 17 near Wilmington.
In Virginia at Little Creek Ferry east of Norfolk.
In Maryland on U.S. Highway 13 near Pocomoke City.
